TOURNIQUET CUFFS

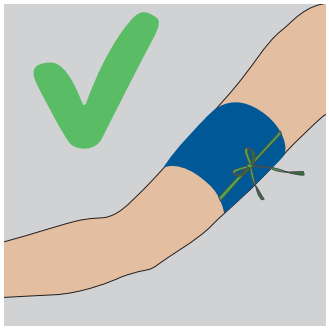
Cuff Design

Single and Double Cuffs in all sizes, for both straight and contour shape and in reusable and single use versions

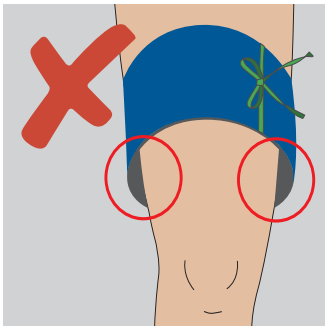
Features

Straight Shape

- Cylindrical design
- Does not show any difference in diameter between proximal and distal part
- Large hook and loop fastener for reliable cuff fixation
- For small or midsize upper extremity



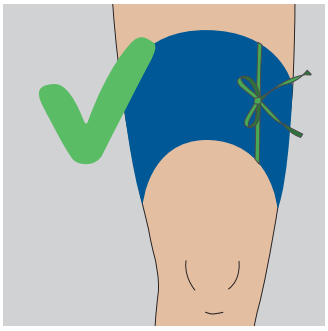
Straight Shape



Straight Shape

Contour Shape

- Arced design with a smaller diameter distally than proximally when applied
- Occludes the blood flow at lower pressures due to an improved fit to the extremity
- For lower conical shaped extremity „mostly"
- Large hook and loop fastener for reliable cuff fixation
- Recommended when the extremity is particularly muscular and for use on obese patients to avoid the risk of mechanical shearing



Contour Shape

Tourniquet Cuffs – Reusable

Comparison

	Fabric Cuffs	Slim-Cuff	Silicone Velcro Cuffs
Single and Double Cuffs	√	–	√
Straight shape and contour shape	√	√	√
Colour-coded for optimal cuff selection	√	√	√
Heavy duty silicone bladder	√	–	√
Low profile design (welded bladder)	–	√	–
Manufactured without the use of natural rubber latex and PVC-free	√	√	√
Cost-effective by validated reprocessing program	√	√	√
Safe in use after proper cleaning and inspection	√	√	√
Waste reduction due to reuse	√	√	√
Wipe disinfection	√	√	√
Easy to clean and dry quickly	–	√	√
Autoclavable 134 °C (273 °F)	–	–	√

Tourniquet Cuffs – Reusable

The Economical Solution

Fabric Cuffs

Slim-Cuff

Silicone Velcro Cuffs

Tourniquet Cuffs – Single use

Safety First

Features

Dispo Cuff

- Prevention against HAI (Hospital-acquired infection)
- For contaminated procedures
- Straight shape and contour shape
- Full range of Single and Double Cuffs
- Colour-coded for optimal cuff selection
- Low profile design
- Sterile packed
- For single use
- Manufactured without the use of natural rubber latex and PVC-free

Dispo Cuffs

Dispenser Box

- Colour coding makes size selection and ordering easier
- Easy storage
- Low profile packaging saves space
